-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. This action is responsive to the Applicant's communication filed on 5/12/2006.
2. Claims 1-28 are pending and presented for examination.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
Group I: claims 1-10, and 20-27, Group II: claims 11-19, and 28
4. Group I (claims 1-10, and 20-27), set forth a method and a system for content based partial downloading of a file wherein a request for a part of a file being received, while the request being obtained, downloading the requested part, classified in class 707, subclass 10.
5. Group II (claims 11-19, and 28), set forth a method and storage medium for creating and maintaining a content repository, wherein the content repository to have a content description component and a content data component being structured, classified in class 707, subclass 102.
6. The inventions are distinct, each from the other because of the following reasons: Inventions in Groups II (claims 11-19, and 28), II and I (claims 1-10, and 20-27) are unrelated. Inventions are unrelated if it can be shown that they are not disclose as capable of use together and they are different modes of operation, different functions or different effects (see MPEP § 806.04 and § 808.01). In the instant case, the different inventions require different modes of operation. Group I requires a method and a

system for content based partial downloading of a file wherein a request for a part of a file being received, while the request being obtained, downloading the requested part, while Group II requires a method and storage medium for creating and maintaining a content repository, wherein the content repository to have a content description component and a content data component being structured

7. Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the reasons given above and there would be a serious search and examination burden if restriction were not required because one or more of the following reasons apply:

- (a) the inventions have acquired a separate status in the art in view of their different classification;
- (b) the inventions have acquired a separate status in the art due to their recognized divergent subject matter;
- (c) the inventions require a different field of search (for example, searching different classes/subclasses or electronic resources, or employing different search queries);
- (d) the prior art applicable to one invention would not likely be applicable to another invention;
- (e) the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

8. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement

may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
